August 10, 1982  
10, 1982

The regular monthly meeting of the Greenville Town Board was held this date at the Greenville Town Hall. The meeting was opened by President of the Board Jack Sprigler. All Board members were present, also in attendance were G. Getrost, J. Gibson, M. Powell, E. Richardson, M. Mason and Bob Isgrigg.

Minutes of the July Meeting and the Financial Reports were presented to each Board member and approved.

Deputy Powell reported that children were playing in one of the abandoned houses where rats and snakes and danger of fire makes it a serious hazard. The Board instructed Mr. Mason to start enforcement of Ordinance 1982-03. Three house were to be considered at this time. The house next to the Christian Church, The Adanson Substant house and the house next to Gladion Pows.

Marshall Richardson said that yard sale along Highway 150 are causing a traffic problem. Buck Spears made the motion to have one large sale a month at the Greenville Town Hall. A permit costing Five Dollars will be issued to each sales table. The people having the sale will also be responsible for cleaning up afterward. This motion was seconded by Ron Lamb. Jack Sprigler made the motion to increase the permit cost from One to Five Dollars Buck Spears seconded.

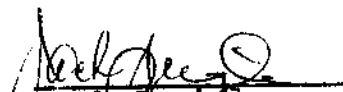

Buck Spears reported an offer of free salt for the Town Streets. The board accepted the offer. After a discussion with Mr. Mason on complying with requests for variances, the Board with a motion by Ron Lamb and seconded by Jack Sprigler gave the Fire Department the Variance requested. Each request will have to be considered separately.

Gary Getrost was instructed to contact Mr. Tom Rough on cost of repairing the Town Truck.

No other business before the Board Ron Lamb for adjournment the motion was seconded by Buck Spears.

Respectfully,

  
Grace Martin  
Clerk-Treasurer

  
Jack Sprigler  
Pres. of the Board

Dear Mr. Snyder:

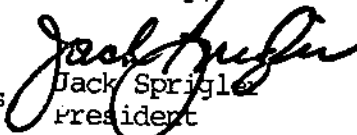

This letter is to advise you the Board of Trustees of the Town of Greenville, Indiana has placed the date of August 1, 1982 by which time you are to complete your obligation under contract for project 7878-01.

If all work has not been done by the date noted above we will place a lien against the bond you provided.

Any decision to commence work must first be cleared through our engineers, Environmental Consultants, Inc., and the Town Board by notification to them twenty-four (24) hours in advance.

We regret this action is necessary but we feel we have been more than accomodating in this matter.

Sincerely,

  
Jack Sprigle  
President  
Board of Trustees

Re: Letter from David Snyder, dated 24 July 1982

Gentlemen:

I have discussed this letter with David Eberenz, the Environmental Consultants, Inc. Inspector on Contract No. 2: Water System Expansion.

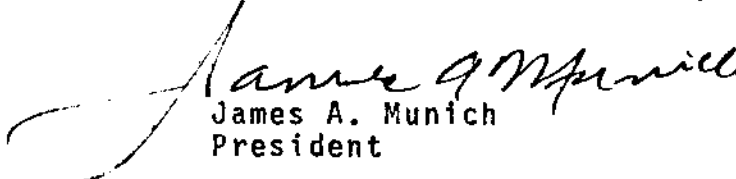

David Eberenz states that David Snyder asked him if Sakrete (pre-proportioned and mixed concrete in paper bags) could be used to encase the creek crossing instead of Ready Mix or Job Mix concrete. David Eberenz gave permission to use Sakrete for the creek crossing encasement, provided that all requirements of the Plans and Specifications were met. The inspector saw quantities of Sakrete stored at the crossing sites, but did not witness actual placement of the encasement, since placement was usually made after normal working hours.

Mr. Eberenz tells me that the Contractor did not request permission to place the unopened bags of Sakrete on and around the pipe in lieu of the specified and detailed encasement.

Some uplift or flotation occurs when the pipe is encased, as shown in the encasement detail D/10, Drawing No. 8. Good practice requires that the pipe be held in position while the concrete is being placed. This does not cause harmful stress.

Very truly yours,

ENVIRONMENTAL CONSULTANTS, INC.

Re: Concrete pipe encasement--Stream crossings  
Greenville, Indiana Water System Improvements  
Contract No. 2

Dear Ralph:

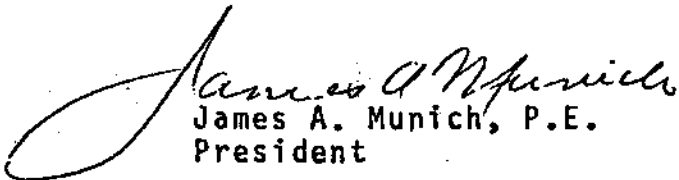

With reference to Environmental Consultants, Inc.'s letters of 2 and 6 July 1982, inquiries by the Engineer and the Greenville Water Company indicate that the 12 inch PVC water line crossing of Jersey Park Creek and Little Indian Creek on the Southwest side of Highway 150 and the 6 inch PVC water line crossing a branch of Little Indian Creek may not have been adequately encased in concrete as required by the Plans and Specifications.

Due to serious difficulties in dewatering the trench, the Contractor, David Snyder's Backhoe and Trenching Service, placed unopened paper bags of Sackrete over the pipe to prevent segregation and washout of the cement.

I have enclosed pertinent correspondence and will discuss this with you in the near future.

Very truly yours,

ENVIRONMENTAL CONSULTANTS, INC.

Re: Stream crossing encasements--Two (2) 12-inch on  
Highway 150; one (1) 6-inch on John Pectal Road

Gentlemen:

Due to a previous out-of-town commitment, I regret that I am unable to attend the meeting this evening.

I met with David Snyder on 9 July 1982 to discuss re-encasement of these stream crossings. Mr. Snyder stated that since it has been more than one year (the guarantee period) after the Farmers Home Administration Inspection and acceptance of the work he performed under Contract No. 2, Water System Improvements, he did not feel that he had a responsibility to correct this portion of the work.

All correspondence on this subject has been sent to Mr. Ralph Shelburn, the Framers Home Administration Engineer, who will not be in his office until Thursday, 12 August 1982. I will discuss this with him Thursday, and inform the Board promptly of his opinion.

I request a few more days to resolve this matter.

Very truly yours,

ENVIRONMENTAL CONSULTANTS, INC.

July 25, 1982

Members of the Board:

Enclosed, please find a check for the amount of \$373.80 to cover the loss of water for Mr. Lenfert's service line. The replacement of the cast iron valve box on John Pectol Road is also complete.

I would like to relate the procedure used for the three creek crossings you requested additional work on. The process we used to concrete encase the water main was to place a sufficient number of bagged concrete on the line to give it a cased effect. This process was done in full agreement and supervision of the resident inspector, Dave Embrenz. A representative from Bob Igrigg's company also knew of this process from a previous project in Edwardsville, Ind. If these particular mains had been concreted as shown on the Engineering drawing, they would have been put in an extreme amount of stress.

We had discussed this process with Mr. Embrenz and we both agreed that in these instances with water problems, etc., this would provide equal or better protection for your lines. If we had been instructed by the inspector not to encase your lines this way, we would have been glad not to do so, as we went to a greater expense to encase them this way.

We are sorry that there has been a misunderstanding on this matter, as we have tried to rectify any problems with our work. I apologize for not being able to attend your last board meeting, but I have been working on a project in Evansville, Ind. and could not get away.

If you feel additional discussion is needed concerning this, please call me and we can set up a meeting with all those involved.

Sincerely,

*David Snyder*

To: The Town of Greenville  
Board of Slectmen

From: Robert and Dena Leslie  
Lot 6  
Parkview Heights SubDivision  
Northwest corner of Route 150  
Maple Road  
Bordered on north by Woodland Drive

Gentlemen and Ladies of the Board, the writers have recently purchased the above property, formerly the property of Wally and Mrs. Miller.

A rain water drainage problem exists on the property. To the north of the property a hill rises from Woodland Drive 24 ft. high and 270 to 300 ft. back from Woodland Drive. This hill drains to Woodland, and the gutter (or swirl) on the north side of Woodland is not deep enough to handle a heavy rain. Therefore, this water crosses the road and drains down to the Leslie's property. It comes in their back door, floods the room behind that door, and runs down into their basement.

To correct this problem, the Leslie's request:

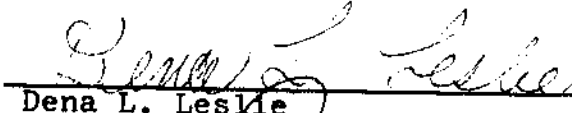

- (1) The town dredge out the gutter on the north side of Woodland Drive, opposite their property.

Permission to dredge has been recieved verbally from the neighbors who live on the property in question.

- (2) At their own expense, The Leslie's propose to build a gutter on the south side of Woodland Drive to further alleviate the problem, and request permission from the Town Board to proceed with this matter.

A drawing is submitted to the Board to show the proposed addition.

Signed:

  
Dena L. Leslie

  
Robert D. Leslie
